Last login: Sun Sep 11 16:49:25 on ttys001

The default interactive shell is now zsh.

To update your account to use zsh, please run `chsh -s /bin/zsh`.

For more details, please visit <https://support.apple.com/kb/HT208050>.

Chriss-MBP:~ chrisboydstun\$ clear

Chriss-MBP:~ chrisboydstun\$ agoric --version

0.16.0

Chriss-MBP:~ chrisboydstun\$ agoric start --reset --verbose

**agoric:** current directory wasn't created by 'agoric init'

Usage: agoric [options] [command]

Options:

-V, --version	output the version
number	
--sdk	use the Agoric SDK
containing this program	
--no-sdk	do not use the Agoric
SDK containing this program	
--docker-tag <tag>	image tag to use for
Docker containers	
-v, --verbose	verbosity that can be
increased	
-h, --help	display help for
command	

Commands:

cosmos <command...>	client for an Agoric
---------------------	----------------------

```

Cosmos chain
  open [options]                                launch the Agoric UI
  init [options] <project>                       create a new Dapp
directory named <project>
  set-defaults [options] <program> <config-dir>  update the
configuration files for <program> in <config-dir>
  install [force-sdk-version]                   install Dapp
dependencies
  follow [options] <path-spec...>               follow an Agoric
Casting leader
  run [options] <script> [script-args...]       run a script with all
your user privileges against the local Agoric VM
  deploy [options] [script...]                 run multiple scripts
with all your user privileges against the local Agoric VM
  start [options] [profile] [args...]           start an Agoric VM

agoric start - runs the default profile (dev)
agoric start dev -- [initArgs] - simulated chain and solo VM
agoric start local-chain [portNum] -- [initArgs] - local chain
agoric start local-solo [portNum] [provisionPowers] - local solo VM

```

```

  help [command]                                display help for
command

```

```

commit 14b20e6054703240754695ba3ba385d0e954d41c (HEAD -> master,
origin/master, origin/HEAD)
```

```
Author: Chris Hibbert <Chris-Hibbert@users.noreply.github.com>
```

```
Date: Wed Aug 31 17:25:12 2022 -0700
```

```
feat: save PSM adminFacet in bootstrap (#6101)
```

```
* feat: save PSM adminFacet in bootstrap
```

```
Additionally, the contractGovernor will now make the adminFacet
available.
```

```
* chore: export AdminFacet type from Zoe
```

```
* chore: correct permissions in startPSM.js
```

```
