Chapter 1

Oh there was a sow who had three little pigs,
 There little piggies had she.
 The old sow always went "oink, oink, oink,"
 and the piggies went "wee, wee, wee-ee-ee."

Now one day one of the three little pigs
 To the other two piggies said he,
 "Why don't we always go oink, oink, oink?"
 It's so childish to go wee, wee, wee-ee-ee!"

These three piggies grew skinny and lean,
 Skinny they well should be,
 For they always would try to go "oink, oink, oink,"
 And they wouldn't go "wee, wee, wee-ee-ee."

Now there three piggies they up and they died.
 A very sad sight to see.
 So don't ever try to go "oink, oink, oink,"
 When you oughta go "wee, wee, wee-ee-ee!"

Observed versus Predicted Clearance Ratio

Study ID	Age [y]	BodyWeight [kg]	Predicted CL [ml/min/kg]	Observed CL [ml/min/kg]	Pred/Obs CL Ratio
Vogelstein 1977	15	77	0.71181	1.74	0.71181
Vogelstein 1977	15	62.5	0.95476	1.44	0.95476
Vogelstein 1977	9	21.5	0.83703	2.56	0.83703

GMFE = 1.206888
