

```
impl Stream for MyOperator {  
    ...  
    // Pull next input (may yield at .await)  
    while let Some(batch) = stream.next().await {  
        // Calculate, check if the output is ready  
        if Some(output) = self.process(batch)? {  
            // "Return" RecordBatch to output  
            tx.send(batch).await  
        }  
    }  
    ...  
}
```
