'role-arn': undefined,  
r: undefined,  
roleArn: undefined,  
staging: true,  
'no-color': false,  
noColor: false,  
fail: false,  
'$0': 'cdk'  
}
```

Determining whether we're on an EC2 instance.

Does not look like EC2 instance.

cdk.json: {

```
  "app": "python3 app.py"  
}
```

```
merged settings: {  
  versionReporting: true,  
  pathMetadata: true,  
  output: 'cdk.out',  
  app: 'python3 app.py',  
  context: {},  
  tags: [],

  staging: true  
}
```

Setting "CDK\_DEFAULT\_REGION" environment variable to eu-central-1

Resolving default credentials

Retrieved account ID [redacted-main account] from disk cache  
Setting "CDK\_DEFAULT\_ACCOUNT" environment variable to [redacted-main account]

```
context: {
  'aws:cdk:enable-path-metadata': true,
  'aws:cdk:enable-asset-metadata': true
}
outdir: cdk.out
env: {
  CDK_DEFAULT_REGION: 'eu-central-1',
  CDK_DEFAULT_ACCOUNT: '[redacted-main account]',
  CDK_CONTEXT_JSON: '{"aws:cdk:enable-path-metadata":true,"aws:cdk:enable-asset-metadata":true}',
  CDK_OUTDIR: 'cdk.out',
  CDK_CLI_ASM_VERSION: '1.16.0',
  CDK_CLI_VERSION: '1.21.1'
}
```

Some context information is missing. Fetching...

Reading AZs for 2:us-east-2

Setting "availability-zones:account=2:region=us-east-2" context to  
{"\$providerError":"Need to perform AWS calls for account 2, but no credentials found. Tried: default credentials.,"\$dontSaveContext":true}

Setting "CDK\_DEFAULT\_REGION" environment variable to eu-central-1

Setting "CDK\_DEFAULT\_ACCOUNT" environment variable to [redacted-main account]

```
context: {
  'availability-zones:account=2:region=us-east-2': {
    '$providerError': 'Need to perform AWS calls for account 2, but no
credentials found. Tried: default credentials.',
    '$dontSaveContext': true
  },
  'aws:cdk:enable-path-metadata': true,
  'aws:cdk:enable-asset-metadata': true
}
outdir: cdk.out
env: {
  CDK_DEFAULT_REGION: 'eu-central-1',
  CDK_DEFAULT_ACCOUNT: '[redacted-main account]',
  CDK_CONTEXT_JSON: '{"availability-zones:account=2:region=us-east-2":
{"$providerError":"Need to perform AWS calls for account 2, but no credentials
found. Tried: default credentials.,"$dontSaveContext":true},"aws:cdk:enable-
path-metadata":true,"aws:cdk:enable-asset-metadata":true}',
  CDK_OUTDIR: 'cdk.out',
  CDK_CLI_ASM_VERSION: '1.16.0',
  CDK_CLI_VERSION: '1.21.1'
}
```

Not making progress trying to resolve environmental context. Giving up.  
[Error at /upg/skeleton] Need to perform AWS calls for account 2, but no credentials found. Tried: default credentials.
