Build failed

Error

We encountered a problem with a command while building your project. To resolve this error, double check your project configuration and installed dependencies are correct and have not changed recently.

```
git clone --depth 1 https://github.com/nornir-automation/nornir .
git fetch origin --force --prune --prune-tags --depth 50 refs/heads/main:refs/remotes/orig
git checkout --force origin/main
cat .readthedocs.yml
asdf global python 3.11.9
python -mvirtualenv $READTHEDOCS_VIRTUALENV_PATH
pip install poetry
poetry config virtualenvs.create false
python -m pip install --upgrade --no-cache-dir pip setuptools
python -m pip install --upgrade --no-cache-dir sphinx readthedocs-sphinx-ext
poetry install --with docs
cat docs/conf.py
```

```
python -m sphinx -T -b html -d _build/doctrees -D language=en . $READTHEDOCS_OUTPUT/html

Running Sphinx v7.3.7

Traceback (most recent call last):
