IN THE NAME OF GOD

Hello to shorebird team!

Last month, tech team decide to switch update system from download and install package to shorebird air code push and we were surprise to see such great service to help our client feels better while using the app.

But as we recently reported, we faced some problem in some region that they can't connect to shorebird servers. After checking the problem, we found the problem is because shorebird service works on google cloud and google cloud service is not available in some regions. Reason could be because of the google closed the servers to that region or that region filtered google cloud. In this case, google close the google cloud. So, shorebird can't connect and get any update.

Also, we discovered that shorebird console and cli not available and get 403 forbidden warning! That means developer should use VPN to work with shorebird.

We tried to fix that issue and we got if clients use VPN, can connect to the servers. So, we decided to find way to reach the shorebird servers by proxy inside the app or any way to achieve our goals, and shorebird team offers that we can use "base_url" to change the end point and add our proxy server URL to proxy the request and reach to shorebird servers. We tried this way in test app and it works well but we got confuse what will happen if we send too many requests per min or sec? shorebird will ban the IP address or not.

So, we are asking to solve the problem not only for us, for all developers and people in some regions like Iran in middle east.

here is some docs about what users get and see while using the test app (reported by our admins):

1- shorebird.yaml file:

```
1   # This file is used to configure the Shorebird updater used by your app.
2   # Learn more at https://docs.shorebird.dev
3   # This file does not contain any sensitive information and should be checked into version control.
4
5   # Your app_id is the unique identifier assigned to your app.
6   # It is used to identify your app when requesting patches from Shorebird's servers.
7   # It is not a secret and can be shared publicly.
8   app_id: 61f0e4d6-c0a5-41b5-80c8-076c514ba799
9
10  # auto_update controls if Shorebird should automatically update in the background on launch.
11  # If auto_update: false, you will need to use package:shorebird_code_push to trigger updates.
12  # https://pub.dev/packages/shorebird_code_push
13  # Uncomment the following line to disable automatic updates.
14  # auto_update: false
15
```

2- what show in shorebird preview
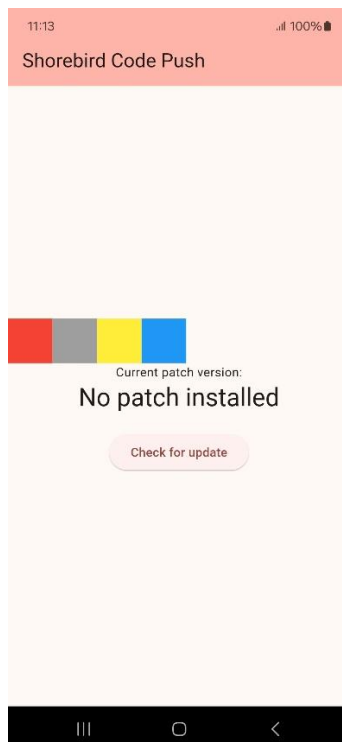

3- what show in terminal

shorebird preview --verbose

✓ Starting app (1.0s)

[Process.start] C:\Users\timez\AppData\Local\Android\Sdk\platform-tools\adb.exe logcat -T 1 -s flutter

--------- beginning of main

10-20 11:18:46.307 18878 18925 E flutter : updater::updater: Update failed: Request failed with status: 403 Forbidden

10-20 11:18:46.307 18878 18925 I flutter : updater::updater: Update thread finished with status: Update had error

and as you see we get : 403 Forbidden

10-20 11:20:49.889 20624 20624 I flutter : [INFO:flutter/shell/common/shorebird/shorebird.cc(161)] Shorebird updater: no active patch.

10-20 11:20:49.889 20624 20624 I flutter : updater::updater: Reporting launch start.

10-20 11:20:49.889 20624 20624 I flutter : [INFO:flutter/shell/common/shorebird/shorebird.cc(184)] Starting Shorebird update

10-20 11:20:49.895 20624 20657 I flutter : updater::network: Sending patch check request: PatchCheckRequest { app_id: "61f0e4d6-c0a5-41b5-80c8-076c514ba799", channel: "stable", release_version: "1.0.5+5", platform: "android", arch: "aarch64" }

10-20 11:20:49.907 20624 20624 I flutter : updater::updater: Reporting successful launch.

10-20 11:20:50.371 20624 20657 E flutter : updater::updater: Update failed: Request failed with status: 403 Forbidden

10-20 11:20:50.371 20624 20657 I flutter : updater::updater: Update thread finished with status: Update had error

Then we add one container with green color to patch it and send update:

shorebird patch android

✓ Fetching apps (0.7s)

✓ Fetching releases (0.3s)

Which release would you like to patch? 1.0.5+5

✓ Fetching aab artifact (0.3s)

✓ Downloading aab (8.1s)

✓ Building patch with Flutter 3.24.3 (5a6dc546e8) (40.5s)

✓ Verifying patch can be applied to release (37ms)

✓ Fetching release artifacts (1.3s)

✓ Downloading release artifacts (5.3s)

✓ Creating patch artifacts (3.7s)

🚀 Ready to publish a new patch!

🎛 App: shorebirdtest (61f0e4d6-c0a5-41b5-80c8-076c514ba799)

📦 Release Version: 1.0.5+5

🕹 Platform: android [arm32 (82.50 KB), arm64 (71.68 KB), x86_64 (78.01 KB)]

🟢 Track: Production

Would you like to continue? (y/N) Yes

✓ Creating patch (2.2s)

✓ Uploading artifacts (3.6s)

✓ Fetching channels (0.3s)

✓ Promoting patch to stable (0.3s)

✅ Published Patch 1!

And we still get 403 with available patch!
then we make a new version with the proxy in shorebird.yaml:

```yaml
1   # This file is used to configure the Shorebird updater used by your app.
2   # Learn more at https://docs.shorebird.dev
3   # This file does not contain any sensitive information and should be checked into version control.
4
5   # Your app_id is the unique identifier assigned to your app.
6   # It is used to identify your app when requesting patches from Shorebird's servers.
7   # It is not a secret and can be shared publicly.
8   app_id: 61f0e4d6-c0a5-41b5-80c8-076c514ba799
9
10  # auto_update controls if Shorebird should automatically update in the background on launch.
11  # If auto_update: false, you will need to use package:shorebird_code_push to trigger updates.
12  # https://pub.dev/packages/shorebird_code_push
13  # Uncomment the following line to disable automatic updates.
14  # auto_update: false
15  base_url: https://update.sys.timez.ir
```

And change the app version and release new version: flutter clean then flutter pub get and last shorebird release android --artifact apk:

shorebird release android --artifact apk

✓ Fetching apps (1.2s)

✓ Building app bundle with Flutter 3.24.3 (5a6dc546e8) (43.8s)

✓ Building APK with Flutter 3.24.3 (5a6dc546e8) (14.2s)

✓ Release version: 1.0.6+6 (1.8s)

✓ Fetching releases (0.9s)

🚀 Ready to create a new release!

🎛 App: shorebirdtest (61f0e4d6-c0a5-41b5-80c8-076c514ba799)

📦 Release Version: 1.0.6+6

🕹 Platform: android

🐦 Flutter Version: 3.24.3 (5a6dc546e8)

Would you like to continue? (y/N) Yes

✓ Fetching releases (0.6s)

✓ Creating release (1.3s)

✓ Updating release status (0.6s)

✓ Uploading artifacts (86.2s)

✓ Updating release status (2.8s)

✅ Published Release 1.0.6+6!

Your next step is to upload the app bundle to the Play Store:

C:\Users\timez\StudioProjects\shorebirds\build\app\outputs\bundle\release\app-release.aab

Or distribute the apk:

C:\Users\timez\StudioProjects\shorebirds\build\app\outputs\flutter-apk\app-release.apk

For information on uploading to the Play Store, see:

https://support.google.com/googleplay/android-developer/answer/9859152?hl=en

To create a patch for this release, run shorebird patch --platforms=android --release-version=1.0.6+6

Note: shorebird patch --platforms=android without the --release-version option will patch the current version of the app.

And we run shorebird preview :

shorebird preview --verbose

[HTTP] GET https://update.sys.timez.ir/api/v1/apps/61f0e4d6-c0a5-41b5-80c8-076c514ba799/releases
