Testscript provides Requests and Evaluations

Channel Type: Passthrough

Approaches to client testing

- Transactional
 - Testscript assertions
 - StructureDefinition tied to TestScript (validation profile)
- Upload
 - Testscript assertions
 - StructureDefinition
- StructureDefinition
 - Differential
 - Snapshot

Testing MHD Doc Src

Proxy Channel Types

- Passthrough – no alterations, no special validations, logging
- MHD – MHD \Leftrightarrow XDS translation, logging
- Evaluation
 - Can be used with MHD
 - Testscript containing only assertions
 - Final Testreport combines results (MHD & assertions)
 - Logging

Plans

- MHD/R4 – this fall/winter
- ...
